The GFM flail is an ideal tool for working on large flat and hilly surfaces, at airports and on cultivated and uncultivated land. It has a double attachment, front and rear. This reversibility means being able to maximise its performance and allows a choice of processing according to requirements.

STANDARD EQUIPMENT

- three-point attachment II and III cat.
- rear rubber protection
- front protection with galvanised and rubber chains
- support feet
- gearbox without inner freewheel
- cardan shaft with freewheel
- cardan protection boot
- rotor with toothed hammers
- oversized hammer supports
- belt transmission
- rear height-adjustable roller with scraper
- internal counterframe
- series of internal counter-elements
- rear hood opening for inspection
- double-acting pistons for horizontal opening
- special powder or liquid painting (primer and enamel)

Mod.			 Kg	 (Hp-kw) *	 (g/min.)		 rotor mm	
GFM-450	4500	3000	2500	185-136	1000	2x16	245	2x5
GFM-550	5500	3000	2700	185-136	1000	2x20	245	2x5

* The horsepower shown in the table are indicative and express the power required by the flail for its operation.

ACCESSORIES ON REQUEST

1. Pair of side skids
