TLC-SP

heavy line

The TLC-SP flail is a tool used for the shredding of grass and branches, for the pruning of vineyards, orchards and olive groves. It has a three-point hitch, an openable hood that facilitates the inspection of the processed material and the state of wear of the machine. Adjustable displacement (max 40 cm) is guaranteed by a hydraulic cylinder that allows its use both in a normal position and in a decentralised position for plantation row work. It adapts to any tracked or wheeled tractor.

STANDARD EQUIPMENT

- three-point hitch
- rear rubber protection
- front protection with galvanised strips
- gearbox with internal freewheel
- cardan shaft
- cardan protection boot
- rotor with toothed hammers
- belt transmission
- rear height-adjustable roller with scraper
- internal counterframe
- series of internal counter-elements
- rear hood opening for inspection
- double acting piston for lateral displacement
- special powder or liquid painting (primer and enamel)
