TLGA

medium-heavy line

The TLGA flail is a piece of equipment used for the shredding of shrubs near ditches, banks and orchards. The TLGA equipment can work both sideways and as a common mulcher thanks to the booms that allow it greater versatility.

STANDARD EQUIPMENT

- three-point hitch
- rear rubber protection
- front protection with galvanised strips
- double stabiliser foot
- gearbox with internal freewheel
- cardan shaft
- cardan protection boot
- rotor with smooth hammers
- belt transmission
- rear height-adjustable roller with scraper
- internal counterframe
- series of internal counter-elements
- pair of side skids
- double acting piston for lateral movement with flow regulator
- double acting piston for angular inclination with D.E. lock valve with flow regulator
- levelling joint
- special powder or liquid painting (primer and enamel)

Mod.								
	(B/H/Z)	L	Kg	(Hp-kw) *	(g/min.)		rotor mm	
TLGA-140	1560/1000/1800	1440	550	30/35-22/26	540	14	140	3
TLGA-150	1660/1000/1800	1540	570	35/40-26/29	540	15	140	3
TLGA-160	1760/1000/1800	1640	590	40/45-29/33	540	16	140	3
