TLGS

medium-heavy line

The TLGS Flail is a piece of equipment used for the shredding of grass and branches of vineyards and orchards. It has a three-point hitch and can be applied to crawler and wheeled tractors. The hydraulic displacement (max 40 cm) allows the work in a decentralised position in order to allow processing closer to the plantations, orchards, etc.

STANDARD EQUIPMENT

- three-point hitch
- rear rubber protection
- front protection with galvanised strips
- gearbox with internal freewheel
- cardan shaft
- cardan protection boot
- rotor with smooth hammers
- belt transmission
- rear height-adjustable roller with scraper
- internal counterframe
- series of internal counter-elements
- double acting piston for lateral displacement
- special powder or liquid painting (primer and enamel)
