TLJL

heavy line

The TLJL flail is a tool used for shredding and pruning in general, ideal for uncultivated areas. It has a three-point hitch and can be applied to crawler and wheeled tractors. The hydraulic displacement (max 45 cm) allows use of the flail in a decentralised position for crop row work.

STANDARD EQUIPMENT

- three-point hitch
- rear rubber protection
- front protection with galvanised strips
- stabiliser foot
- gearbox with internal freewheel
- cardan shaft
- cardan protection boot
- rotor with toothed hammers
- belt transmission
- rear height-adjustable roller with scraper
- internal counterframe
- series of internal counter-elements
- rear hood opening for inspection
- oversized hammer supports
- double acting piston for lateral displacement
- special powder or liquid painting (primer and enamel)

Mod.								
	(B/H/Z)	L	Kg	(Hp-kw) *	(g/min.)		rotor mm	
TLJL-200	2160/920/970	2000	850	60-44	540/1000	13	180	5
TLJL-220	2400/920/970	2240	900	70-52	540/1000	15	180	5
TLJL-250	2700/920/970	2540	1000	80-59	540/1000	17	180	5
TLJL-280	2960/920/970	2800	1100	100-73	540/1000	19	180	5

* The horsepower shown in the table are indicative and express the power required by the flail for its operation.

ACCESSORIES ON REQUEST

1. Pair of side skids
2. Galvanised chains and rubber to replace the strips
3. Rubber protection on the strips

The technical data, illustrations and features are indicative and do not commit the manufacturer.
