The UFK flail is an ideal piece of equipment in forestry for the mulching of brushwood and undergrowth, light thinning. In agriculture it is designed for the clearing of orchards and the tidying of transit routes, use with rear assembly and reversible guide.

STANDARD EQUIPMENT

- three-point hitch cat. II and III
- sheet metal body with high yield index
- internal counterframe with anti-wear sheet metal
- series of internal counter-elements
- front and rear protection with galvanised chains
- support feet
- gearbox without internal freewheel
- cardan shaft with freewheel
- cardan protection boot
- rotor with two-way retractable hammers
- belt transmission
- pair of skids with wear-resistant sheet metal reinforcement
- special powder or liquid painting (primer and enamel)

Mod.								
	1850	1550	Kg	(Hp-kw) *	(g/min.)		rotor mm	
UFK- 1550	1850	1550	1310	70-50	540/1000	30	430	4
UFK- 2150	2450	2150	1550	110-80	540/1000	42	430	4

* The horsepower shown in the table are indicative and express the power required by the flail for its operation.

ACCESSORIES ON REQUEST

1. Manual lowering stand
2. Rear hood with hydraulic opening
